SMART+

INKJET FILMS

SmartPrint is a DICOM-compatible software solution used with Smart+ inkjet films to produce high definition, photo realistic radiology image prints that are water- and scratch-resistant

SmartPrint is an advanced DICOM software designed to bring professional-grade medical image printing to your facility. It enables high-definition, photo-realistic printing on inkjet films with exceptional clarity and detail. Prints produced with SmartPrint are water- and scratch-resistant, ensuring durability and long-lasting quality. Ideal for radiology departments and diagnostic centers, SmartPrint offers an affordable, reliable alternative to traditional dry film printers without compromising on image quality.
